GitHub: <https://github.com/sudarshan2001/sudarshan2001>

Location: Chennai, INDIA.

OBJECTIVE:

A versatile and technically skilled individual with proven abilities in problem-solving, project management, and analytical thinking. Transitioning to the IT sector, I am excited to bring my strong communication skills, technical aptitude, and dedication to continuous learning to a role where I can contribute to cutting-edge projects. My goal is to leverage my ability to analyze data, develop solutions, and drive innovation in a rapidly evolving technological landscape.

EDUCATION:

Bachelor Of Engineering in Mechanical Engineering

Sri Ramakrishna Engineering College, Coimbatore, TamilNadu.

Graduated: 2023

CGPA: 7.97

HSC

George Higher Secondary School, Vishnupuram, TamilNadu.

Completed: 2019

Percentage: 84%

SSLC

Sri Sankara Matric Higher Secondary School, Peralam, TamilNadu.

Completed: 2017

Percentage : 96.6%

TECHNICAL SKILLS:

- Programming Languages: Python, SQL
 - Data Science & Machine Learning: Pandas, NumPy, Scikit-learn
 - Mechanical Engineering Tools: AutoCAD, SolidWorks
 - Database Management: MySQL
 - Other: Problem-solving, Team Collaboration
-

PROFESSIONAL EXPERIENCE:

Machine Learning Intern

Shiash Info Solutions Private Limited, Chennai, TamilNadu.

[5th August 2024] – Present

- Collaborate with a cross-functional team to develop machine learning models for predictive analysis.
- Conduct data preprocessing, feature engineering, and model validation.
- Utilize Python and TensorFlow to implement machine learning algorithms.
- Contribute to the deployment of models in a production environment.

Mechanical Engineering Intern

Caterpillar India Private Limited, Thiruvallur, TamilNadu

[10th February 2023] – [10th April 2023]

- Developed technical documentation for engineering projects.
- Logistics department works.

PROJECTS:

YouTube Data Harvesting and Warehousing using SQL and Streamlit - Data Science Project

- **Description:** Developed a comprehensive tool for harvesting and analyzing YouTube data, including video statistics, user engagement metrics, and content trends.
- **Technologies Used:** SQL for data extraction and manipulation; Streamlit for interactive data visualization and user interface.

Responsibilities:

- **Data Extraction:** Designed and executed SQL queries to extract relevant data from YouTube's API and other sources.
- **Data Processing:** Cleaned and organized data using SQL to ensure accuracy and usability.
- **Visualization:** Created an interactive dashboard with Streamlit to visualize key metrics and trends, allowing users to filter and analyze data dynamically.
- **Implementation:** Deployed the application for end-users to access and interact with data insights.

Influence Of Ricehusk On Surface Quality Banana And Jute Hybrid Composite During AWJM Process - Mechanical Engineering Project

- **Description:** Investigated the impact of incorporating rice husk on the surface quality of composite materials made from banana and jute fibers during the Abrasive Water Jet Machining (AWJM) process.
- **Technologies and Methods Used:** Conducted experiments using AWJM to analyze surface quality; employed material characterization techniques and statistical analysis.

Responsibilities:

- **Experimental Setup:** Designed and executed experiments to integrate rice husk into banana and jute fiber composites.
- **Data Collection:** Monitored and recorded surface quality metrics and performance parameters during the AWJM process.
- **Analysis:** Analyzed the effects of rice husk on the surface finish of the composite materials, using statistical tools to interpret data and draw conclusions.
- **Reporting:** Compiled findings into a comprehensive report, detailing the impact of rice husk on composite surface quality and suggesting potential improvements.

CERTIFICATIONS:

- Emerging Trends In Automotive Industry And Autonomous Cars – 2022
- Design Workshop On “Insights Of Industrial Design” – 2022
- Chatgpt For Everyone – 2024
- PowerBi – 2024
- Python – 2024
- SQL – 2024
